#### **About The Halloween Helpers**

The Halloween Helpers was conceived by 11-year-old Emma Rose Shapiro while sorting through costumes from years past. The young community servant realized that there are children fortunate enough to get a new costume every year and those who do not even get one. Emma's goal is to enlist children who outgrow or become disinterested in previous years' costumes and share them with kids in our own community who would not typically receive them. Through this one simple effort, Emma's ultimate objective is to provide children with life-long memories, develop self-worth, and build stronger communities.
